

Lysulin, Inc., was formulated by Dr. John Burd, Ph.D., a renowned diabetes scientist and Founder of Dexcom, the worldwide leader in Continuous Glucose Monitoring systems. **Lysulin, Inc., is EDI Capable and ready to service your agency.**

CORE COMPETENCIES

THE PROBLEM

Excess sugar in the bloodstream attaches to proteins, adversely affecting how these proteins are meant to work. As the amount of sugar-coated protein increases in the body, so does the A1c level.

THE SOLUTION

Lysulin helps to remove excess glucose from the body in order to maintain healthy A1c levels and proper functioning of one's insulin receptors. Lysulin works differently than any other product on the market.

DIFFERENTIATORS

Lysulin's PATENTED formula provides a unique ability to support the body:

- ▶ Lysulin is the only nutritional blood sugar supplement with 6 patents and 2 published clinical studies showing its effectiveness.
- ▶ Lysulin is the only dietary supplement shown in clinical tests to remove excess glucose from the bloodstream.
- ▶ Lysulin helps insulin receptors function normally to maintain healthy glucose levels.
- ▶ Lysulin has been clinically shown to help maintain healthy A1c levels when taken daily.
- ▶ Lysulin contains a patented blend of Lysine, Zinc, and Vitamin C and works by absorbing glucose like a sponge; it can be safely removed from the body.

PAST PERFORMANCE

- ▶ In 2018, Lysulin launched a line of natural dietary supplements shown in published human clinical studies to remove excess glucose from the bloodstream, promote healthy A1c levels, and insulin function.
- ▶ **Between 2018 and 2020, Lysulin has sold over 100,000 units of combined product units with sales over \$1.5 Million**
- ▶ In 2021, Lysulin introduced a first-of-its-kind weight loss shake that contains the patented Lysulin ingredients to help people maintain blood glucose levels, insulin function, healthy A1c levels, and lose weight.
- ▶ **With the addition of Lysulin's Vanilla and Chocolate Shakes in 2021, Lysulin has added an additional \$250,000 in Shake sales alone.**
